ABOUT A COLOR
JUST FOR YOU

CUSTOM COLOR
Call for pricing.

Colors are shown for reference only, and may vary due to printing limitations and dye-lot subtleties. Color chips for Traditional and Specialty finishes are available upon request. Premium and Artisan finishes provide a beautiful, custom look; however, the color may vary in appearance based on your selected pattern and may differ from panel to panel.

GENERAL INFORMATION

MATERIAL

M-Boss Inc. ceiling panels are made of two materials: aluminum or solid copper. All panels are manufactured using a proprietary process that provides a unique high quality product. During the manufacturing process, each individual piece is inspected in order to ensure each panel yields a high definition of detail to the pattern.

INSTALLATION

M-Boss Inc. ceiling panels are designed for two types of installation: nail-up to a wood substrate and lay-in to any standard suspension ceiling grid. The preferred wood substrate for nail-up applications is a minimum 3/8" plywood.

The panels will drop into any standard commercial, 15/16" or 9/16" T-Bar suspension grid, consisting of a pre-punched roll-formed steel with exposed flange surface. Main runners and cross runners shall be installed to form 2' x 2' square openings. The grid shall be hung flat and level, suspended by 12-gauge pre-straightened steel wire @ 4' O.C. With solid copper panels it is recommended that installers wear cotton gloves in order to prevent depositing oils on the panels during installation.

PANEL SPECIFICATIONS

M-Boss Inc. copper panels are available as a nominal nail-up size of 24-3/8" x 24-3/8", 0.016" thick and weighing 3.95 pounds per panel or as a nominal lay-in size of 23-7/8" x 23-7/8", 0.016" thick and weighing 3.01 pounds per panel.

M-Boss Inc. aluminum panels are available as a nominal nail-up size of 24-3/8" x 24-3/8", 0.016" thick and weighing 0.95 pounds per panel or as a nominal lay-in size of 23-7/8" x 23-7/8", 0.016" thick and weighing 0.91 pounds per panel.
