15/16" GRID SLEEVES AND CUFFS

- Make a decorating statement with any standard 15/16" suspension/drop ceiling grid system by adding M-Boss Inc. Grid Sleeves and Cuffs
- Available in any M-Boss Inc. finish or call for a custom color
- Available in aluminum or solid copper
- Components include (LISTED IN ORDER OF INSTALLATION):
 - 4-Way Cuffs
 - 3-Way Cuffs (for intersections at the room perimeter)
 - 2-Way Cuffs (for inside and outside corners)
 - 1-Way Cuffs (for 2 x 4 grid systems)
 - Main Sleeves
 - Perimeter Sleeves

M-Boss Inc. Grid Sleeves wrap completely around the grid to cover the entire surface, even the grid edges.

Easy to install. First, clean existing grid with and household solvent. Next, starting at the center of the room: apply cuffs, followed by the sleeves. Simply peel back the outer layer of the pre-applied Peel N' Stick tape and press into place, making sure to align the end of the 2' Cover against the cross bar intersection. NOTE: Apply the Cuffs first, since the Covers will be applied over top of them.

Saves time and money
(Less costly than having a dirty grid system replaced)

Turns any grid system into a design element
(blending the system into the panels,
or accenting the system in a contrasting color)

parts list for a 12' x 12' room
